

CTS SPLIT CORE POWER QUALITY CURRENT TRANSFORMER MINI SERIES

Split current transformers for the measurement of AC loads and Power Quality analysis

The split current transformers **CTS Split Core Current Transducer Mini Series** suitable for the measurement of AC loads, are equipped with a snap-on, screwless mounting system. The ideal solution for an easy and time saving installation of the Electrex instruments avoiding to disconnect the primary cables. The high accuracy, even at low currents / powers, makes possible to be used also for the management of the Power Quality. The **CTS DC Hall** series for the measurement of the DC current is also available.

- Product range from 100 to 500A with a 1A secondary
- Accuracy class 0,5, 1, 3%
- Snap-on, screwless mounting system

- Protection on the opening of the secondary circuit
- Comply with EN61010-1, IEC 60044-1
- Non flammable plastic case / shield

Technical Specifications CTS 24-100

Nominal current	100A AC
Maximum applicable current	120A AC
Internal hole diameter	24 mm
Operating Frequency	10-5K Hz
Nominal load	0,2VA
External dimensions of the shell in mm	width 45, height 76, depth 36
Non flammable shell material	P.P. UL-94V-0
Insulation resistance	higher than 100MΩ at 500V
Insulation voltage	AC 2200V/1 minute (between the output terminal and the shell)
Accuracy Class	1

Technical Specifications CTS 35-200

Nominal current	200A AC
Maximum applicable current	240A AC
Internal hole diameter	35 mm
Operating Frequency	10-5K Hz
Nominal load	0,2VA
External dimensions of the shell in mm	width 63, height 94, depth 40
Non flammable shell material	P.P. UL-94V-0
Insulation resistance	higher than 100MΩ at 500V
Insulation voltage	AC 2200V/1 minute (between the output terminal and the shell)
Accuracy Class	1

Technical Specifications CTS 35-400

Nominal current	400A AC
Maximum applicable current	480A AC
Internal hole diameter	35 mm
Operating Frequency	10-5K Hz
Nominal load	0,2VA
External dimensions of the shell in mm	width 63, height 94, depth 40
Non flammable shell material	P.P. UL-94V-0
Insulation resistance	higher than 100MΩ at 500V
Insulation voltage	AC 2200V/1 minute (between the output terminal and the shell)
Accuracy Class	1

Technical Specifications CTS 24-100 (PFC0411)

Nominal current	100A AC
Maximum applicable current	240A AC
Internal hole diameter	24 mm
Operating Frequency	10-5K Hz
Nominal load	0,5VA
External dimensions of the shell in mm	width 45, height 75, depth 34
Non flammable shell material	P.P. UL-94V-0
Insulation resistance	higher than 100MΩ at 500V
Insulation voltage	AC 3000V/1 minute (between the output terminal and the shell)
Accuracy Class	3

Technical Specifications CTS 24-200

Nominal current	200A AC
Maximum applicable current	240A AC
Internal hole diameter	24 mm
Operating Frequency	10-5K Hz
Nominal load	0,5VA
External dimensions of the shell in mm	width 45, height 75, depth 34
Non flammable shell material	P.P. UL-94V-0
Insulation resistance	higher than 100MΩ at 500V
Insulation voltage	AC 3000V/1 minute (between the output terminal and the shell)
Accuracy Class	1

Technical Specifications CTS 24-250

Nominal current	250A AC
Maximum applicable current	300A AC
Internal hole diameter	24 mm
Operating Frequency	10-5K Hz
Nominal load	1,0VA
External dimensions of the shell in mm	width 45, height 75, depth 34
Non flammable shell material	P.P. UL-94V-0
Insulation resistance	higher than 100MΩ at 500V
Insulation voltage	AC 3000V/1 minute (between the output terminal and the shell)
Accuracy Class	1

Technical Specifications CTS 36-300

Nominal current	300A AC
Maximum applicable current	360A AC
Internal hole diameter	36 mm
Operating Frequency	10-5K Hz
Nominal load	1,5VA
External dimensions of the shell in mm	width 57, height 92, depth 40
Non flammable shell material	P.P. UL-94V-0
Insulation resistance	higher than 100MΩ at 500V
Insulation voltage	AC 3000V/1 minute (between the output terminal and the shell)
Accuracy Class	1

Technical Specifications CTS 36-500

Nominal current	500A AC
Maximum applicable current	600A AC
Internal hole diameter	36 mm
Operating Frequency	10-5K Hz
Nominal load	0,5VA
External dimensions of the shell in mm	width 57, height 92, depth 40
Non flammable shell material	P.P. UL-94V-0
Insulation resistance	higher than 100MΩ at 500V
Insulation voltage	AC 3000V/1 minute (between the output terminal and the shell)
Accuracy Class	0,5

CTS DC HALL SPLIT CORE CURRENT TRANSDUCER MINI SERIES

Split current transformers for the measurement of DC loads

The split current transformers **CTS DC Hall Split Core Current Transducer Mini Series** for the measurement of AC loads, can be used with the Electrex instruments of the DC Hall series paired with DC Channel Split Core Current Converter. Equipped with a snap-on, screwless mounting system. The ideal solution for an easy and time saving installation of the Electrex instruments of the DC Hall series in situations where it is not possible to disconnect the power supply.

- Product range from 50 to 500A (other versions available)
- Accuracy class 1%
- Snap-on, screwless mounting system
- Reduced size and low costs of installation
- Comply with EN61010-1, IEC 60044-1
- Insulated current measurement

Technical Specifications CTS DC 10-50

Nominal current	50A
Internal hole diameter.....	10 mm
Saturation current	75A
Nominal output voltage.....	±4V
Power supply voltage.....	±15V 25mA
Insulation voltage	AC 1500V/1 minute (between the output terminal and the shell)
Insulation resistance	max 500MΩ at DC 500V
Linearity	±1.0% In
External dimensions of the shell.....	width 24 mm, height 41 mm, depth 27 mm
Cable length	30 cm
Working temperature	-15/+65 °C

Technical Specifications CTS DC 16-100

Nominal current	100A
Internal hole diameter.....	16 mm
Saturation current	150A
Nominal output voltage.....	±4V
Power supply voltage.....	±15V 25mA
Insulation voltage	AC 1500V/1 minute (between the output terminal and the shell)
Insulation resistance	max 500MΩ at DC 500V
Linearity	±1.0% In
External dimensions of the shell.....	width 30 mm, height 45 mm, depth 32 mm
Cable length	30 cm
Working temperature	-15/+65 °C

Technical Specifications CTS DC 24-250

Nominal current	250A
Internal hole diameter.....	24 mm
Saturation current	625A
Nominal output voltage.....	±4V
Power supply voltage.....	±15V 25mA

Insulation voltage	AC 1500V/1 minute (between the output terminal and the shell)
Insulation resistance	max 500MΩ at DC 500V
Linearity	±1.0% In
External dimensions of the shell.....	width 45 mm, height 65 mm, depth 34 mm
Cable length	30 cm
Working temperature	-15/+65 °C

Technical Specifications CTS DC 36-500

Nominal current	500A
Internal hole diameter.....	36 mm
Saturation current	750A
Nominal output voltage.....	±4V
Power supply voltage.....	±15V 25mA
Insulation voltage	AC 1500V/1 minute (between the output terminal and the shell)
Insulation resistance	max 500MΩ at DC 500V
Linearity	±1.0% In
External dimensions of the shell.....	width 57 mm, height 82 mm, depth 40 mm
Cable length	30 cm
Working temperature	-15/+65 °C
