iHost – Monitor your entire grid around the clock

Data concentrator for short-circuit and earth fault indicators

- Bundles and processes all data received from remote field devices
 - Provides data access at any time in various ways and devices
- Central management of all field devices – with one click
- Grid monitoring: system overview, data analysis, health checks
 - Configuration and firmware updates from SCADA

Data on demand

- Customised visualisation of data and alarms
- Individual notifications, generated automatically

Embedded database

- Grid data available from day one of installation
- Flexible data provision for asset management, planning, engineers and further user
